STATEMENT 12

Greenpeace, Inc. 52-1541501 2004 Program Accomplishments

Greenpeace works to expose global environmental issues and promote solutions essential to protecting and preserving the environment through education, lobbying, advocacy and peaceful direct action. The following descriptions delineate some of Greenpeace, Inc.'s major program accomplishments by month:

January

The year began with a front-page article in the (Jan. 23rd) *Wall St. Journal* on the risk of a terrorist attacks on trains and trucks hauling cargoes of hazardous chemicals such as chlorine through Washington, D.C.

The Outreach team organized 1,200 people in Miami Beach to recreate a Picasso drawing symbolizing justice and freedom of speech. This effort helped build momentum on the indictment against Greenpeace for our work to stop illegal mahogany from entering the US from the Amazon. The Miami Herald featured the project on Sunday, January 18th with a front-page photo and story in Metro section that also printed in El Nuevo Herald (Spanish sister of the Miami Herald).

February

Thanks to Greenpeace uncovering the truth, the Bush Administration stepped away from a high-profile assertion about Al-Qaeda nuclear threats. In his 2002 State of the Union address, President Bush stated that U.S. operatives had uncovered "diagrams of American nuclear power plants" in Afghanistan's rugged mountain caves. "Our discoveries in Afghanistan confirmed our worst fears," continued President Bush, describing Al-Qaeda nuclear and chemical warfare ambitions. However, an investigation conducted by Greenpeace forced the White House to back away from this claim.

We released an annex to the Brazilian State of Conflict report about the Amazon, which identified Texas-based Ihlo Sales & Import Company as the single largest importer of wood from the Madenorte area. Grupo Madenorte has been identified as a company that uses violence against local community members and activists in order to intimidate and carry on its illegal logging operation in the Porto de Moz region.

March

Construction began on the PVC-free Habitat house in New Orleans with loads of volunteers, Greenpeace staff, the Rolling Sunlight and a successful press briefing with the Healthy Building Network.

April

The Habitat House was successfully completed and the family moved in during Earth Week.

May

The Clean Energy Now Campaign kicked off its mercury-testing program on May 4th in Philadelphia. Working with a local salon owner, the campaign took over the Francis Salon in the City center to launch the campaign. When all was said and done, after two hours of sampling, the campaign was

able to conduct almost 50 tests. By the end of the year, we had conducted salon events in approximately 10 states.

We brought our message on global warming to ExxonMobil in its hometown at the company's Annual General Meeting (AGM). For the two days before the meeting, Greenpeace projected 100-foot images of dramatic global warming impacts onto both the AGM location and the building directly across the street from ExxonMobil global headquarters. Each image was labeled "Global Warming Fueled by ExxonMobil" and directed people to our spoof website, www.TheDayAfterTomorrow.org

During this month, more than 100,000 people all around the world e-mailed President Bush and then Attorney General John Ashcroft to condemn the Greenpeace prosecution in Miami. The judge acquitted Greenpeace on all charges, ruling that there was insufficient evidence to send the case to the jury. The prosecution's case was unproven before we even presented our defense.

The California State Board of Trustees voted to create a clean energy policy for the country's largest university system. Highlights included great support from the state Treasurer, Speaker of the House, and State Architect, as well as 14 press clips.

June

We launched our Web site www.ExxonSecrets.org to expose front groups and scientists that ExxonMobil has funded to the tune of \$12 million in the past few years to convince elected officials and the public that global warming may not be real.

Greenpeace International and Greenpeace Russia traveled to Savannah for the G8 summit. The Russian photo exhibit entitled "Half Life, Living with the Effects of Nuclear Waste" documenting the real costs of plutonium production at Russia's Mayak site, was presented in a local gallery. The G8 failed to offer any further funds for a MOX fuel program in Russia, which was the goal of our work.

Community activists joined Greenpeace for the launch of our first U.S. Forest Rescue Station, at the site of the proposed Kelsey Whiskey timber sale, in southern Oregon. The Station, which was open to the public for workshops, hikes and other educational activities, was our hub for the campaign calling for greater protection and restoration of forests on U.S. public lands, and a moratorium on commercial logging.

We released our report, *Sonic Impact: A Precautionary Assessment of Noise Pollution from Ocean Seismic Surveys*, at the United Nations during International Ocean's Week. This Greenpeace report was extremely well received and provides data on seismic testing and the impacts on ocean creatures.

July

We toured some of the dirtiest power plants in the nation to highlight the serious health and environmental impacts from coal fired plants. Using the Rolling Sunlight, the team visited four power plants, erecting a monument at each to premature deaths from power plant pollution. In Elrama, PA the team set up 563 crosses to symbolize the 563 premature deaths annually from coal fired power plant pollution in the Pittsburgh metropolitan area.

August

TrueMajority sent an e-alert to a subset of their list that had submitted comments to the EPA on the Bush Administration's proposed mercury regulations. 60,000 emails were sent and over 2000 mercury kits were sold in a few days through the Greenpeace website.

The first students arrived for our new semester program. The program is comprised of college students who come to Greenpeace for a semester to learn intensive campaign, organizing and direct action skills. They provide substantial contributions to our campaign work with us while they are in the program and provide our student network with talented activists/organizers when they return to campus.

September

We teamed up with Aveda hair salons to test 1,000 clients who came to get their hair styled. We trained stylists on how to collect hair samples and talk to their customers about the dangers of mercury and dirty energy as well as clean energy solutions. Press conferences were held at seven salons generating local media both print and news.

We led a tour with Greenpeace Mexico to the Coronado Islands in Baja with state officials, other NGOs in the coalition and naturalists from California. Our goal was to show the biological significance of the area that would be affected by a Liquid Natural Gas terminal. The *Arctic Sunrise* met us near the islands and we held a bi-national press conference on the water, where both California Assemblywoman Christine Kehoe and CPUC Commissioner Loretta Lynch talked to Mexican press.

Through e-alerts and lobbying, we won a victory for endangered rainforests in Asia at the UN Convention on International Trade in Endangered Species (CITES) meeting! Ramin wood was upgraded on the endangered list, thereby gaining increased protection that should help stop the export of ramin timber coming from illegal and destructive activities. Ramin wood comes primarily from the endangered rainforests of Indonesia, Malaysia and Singapore and is sold in the U.S. market in the form of baby cribs, window blinds, pool cues, etc.

October

The Environmental Quality Institute (EQI) at the University of North Carolina-Asheville released interim results of Greenpeace's Mercury Hair Sampling Project on October 20th. The survey found mercury levels exceeding the EPA's recommended limit in 21 percent of women of childbearing age tested. This is part of the larger mercury testing project that Greenpeace has been running publicly since Mother's Day for the opportunity to engage people – who care about their health, who wanted to take action to fight for a better energy policy, including clean energy. The final report is planned for the first quarter of 2005.

November

The forest research team discovered that wood chips from the Viking Mill in SE Alaska, which uses both Tongass National Forest and private land wood, were being shipped to Georgia Pacific's Oregon

pulp/paper mill to be made into Brawny paper towels. Upon informing Georgia Pacific that we were aware of this product stream and upon requesting that they discontinue purchasing chips from this region, the company agreed to let its contract with Viking Lumber expire in the spring. This was our first win for a market-based approach to protecting the Tongass National Forest.

As part of our ongoing work in the Amazon, Brazilian president Luis Inacio Lula da Silva signed an agreement to protect five million acres of Amazon rainforest. The decision represents a major victory for local residents, who have lived amidst a raging conflict over land and forest, and for the millions of people worldwide who are concerned about protecting the earth's biodiversity. The protected lands will take the form of two reserves located in the state of Para. This state is the largest producer and exporter of wood products in the Brazilian Amazon (recall our international report on crime in the state of Para early this year linked to illegal activity in the Amazon).

December

When the *Selendang Ayu* ran aground in the Aleutian Islands, Greenpeace was there. The Malaysian freighter had close to half a million gallons of heavy bunker fuel oil aboard, and we were the first environmental group on the ground, transmitting the first visuals on the beach that showed visible oil spill along the shoreline.

Summary of program expenditures
